Sam Millay

smillay55@gmail.com | linkedin.com/in/sam-millay

Education

Middlebury College — Middlebury, VT
BA Computer Science, Minors in Spanish and Philosophy — February 2027 (expected)

- GPA: 3.78/4.0 | College Scholar: Highest Academic Achievement
- Relevant Coursework: Software Development, Data Structures, Algorithms and Complexity, Computing for the Sciences, Remote Sensing, Earth's Oceans and Coastlines
- Study Abroad: Universidad Carlos III de Madrid and DIS Copenhagen (2024–2025)

Experience

Jaia Robotics — Bristol, RI
Robotics Engineering Intern — June 2026–Present

- Build and ship features for Corner Cupboard, Jaia's internal Django/MySQL inventory and asset-management application.
- Develop within the JaiaBot C++/ROS simulation stack for autonomous marine survey robots.

Middlebury College — Middlebury, VT
Research Assistant — Summer 2025

- Researched the efficacy of a Lagrangian, Voronoi-based model to simulate atmospheric fluid movement.
- Programmed 6-day simulation test cases with 160,000+ particles to evaluate the model.
- Co-authored paper published in the *Journal of Computational Physics*; delivered a poster presentation at AGU 2025.

NASA DEVELOP
Remote Sensing Analyst — Summer 2024

- Investigated the feasibility of using satellite data to track phytoplankton events in Rhode Island.
- Processed, analyzed, and visualized satellite imagery and compared it to on-site data.
- Partnered with the EPA and Rhode Island DEM; invited to present findings at EPA Rhode Island headquarters.

AmeriCorps: Generation Teach — Boston, MA
Engineering Teaching Fellow — Summer 2023

- Taught two sections of 8th grade engineering; designed curriculum and carried out daily lesson plans.

Companies

Lyonesse — *Founder* — 2026–Present

- Building a survey-data-to-answers platform for the seafloor that turns underwater 3D survey data (point clouds, photomosaics) into maps and insights for habitat monitoring.
- Running customer discovery with coral restoration programs; building the hosted multi-project platform on Supabase.

Leif — *Founder* | leifkey.com — 2026–Present

- Designed and launched a USB-C key and Mac/iPhone apps that block distracting apps and sites until the key is plugged in.
- Designed a custom 11×16 mm PCB manufactured and assembled by JLCPCB; wrote the key firmware and the signed, notarized native macOS app.
- Launched the website and Stripe pre-orders; running a friends trial and creator outreach.

CoastalRisk.org — *Founder* — 2024–2025

- Built a web product that generates address-level shoreline flood and climate risk reports, integrating GIS data, Google APIs, and front- and back-end code.

Leadership

The Middlebury Dome — *Co-Founder* — 2023–2024

- Co-led proposal for a 40-foot geodesic dome community space; wrote grant applications and secured $12,000 in funding.

High Mountain Institute — *Gap Student* — Fall 2022

- Elected to lead 11 students on an 18-day instructorless expedition through Patagonian wilderness.

Skills and Interests

- **Programming:** Python, C++, C, Swift, Java, JavaScript, SQL, R, MATLAB, Django, React, ROS, MySQL, Supabase, Git, Google Earth Engine, QGIS
- **Hardware:** PCB design, microcontroller firmware, 3D printing
- **Language:** Fully proficient in Spanish | **Certifications:** Wilderness First Responder, CPR, AED, PADI Open Water Diver
- **Interests:** Backpacking, Ultimate Frisbee, Marathoning, Boston Celtics
